FOUNTEK RIBBON TWEETER SOLD IN MATCHED PAIRS

Features

High-pressure injection molded 5mm faceplate.
Pure Aluminum ribbon (not a metalised film type).
Super strong Neodymium magnet for high efficiency.
Built-in Impedance conversion transformer
Incredibly flat impedance for easy crossover design.
Effective from 1,700 Hz upwards due to the large diaphragm area and low self-resonance.
Extremely thin diaphragm (0.009mm Aluminum foil) best for a High degree of signal fidelity and broad frequency response.
Only 11mg mass for instantaneous signal response and micro-detail.
Low distortion factor, good power-handling capabilities, highly linear impedance and amplitude frequency response and broad frequency response range. Flat impedance curve from 1KHz to 40KHz.
Individually factory tested and assessed then paired for efficiency and response matching.
Very competitively priced for this level of technology.
Upgrade to the ultra high frequency response of todays equipment.

PURE RIBBON TRANSDUCER - 2KHz → OVER 40KHz!

World renowned as one of the best high-end loudspeaker drivers available. This technology is based on the use of a pure aluminium ribbon element suspended in a high flux magnetic field. This diaphragm weighs 30x less and has a surface area 10 times larger than a conventional dome tweeter. The specifications and sound quality is the next step up in performance offering instantaneous signal reproduction, rarely heard micro-detail with exquisitely fast decay times. This translates into incredible realism. A built-in coupling transformer is used to match the impedance giving a very smooth response for easy crossover design and minimal phase errors. This tweeter is sold in factory tested matched pairs. Buy 1 to receive 2.
Ribbon 11mg 480mm² Al.
TX 6 ohm nominal (DC=0.01 ohm)
Sens 96dB (2.83V/1M)
Power 14Wrms (Max 40W)
Pair JP30
Sold in matched pairs only.
