

3 times the light

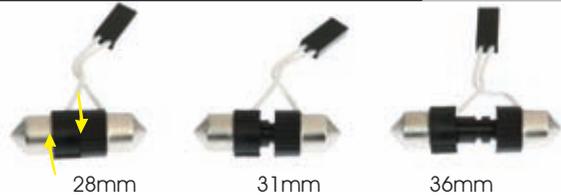

Hyperperformance **SUPER SMD LED**

Each Super SMD LED in-fact 3 Surface mount led's in one package. The performance of a Super SMD LED is far superior to a standard LED. For uncompromising performance, choose Super SMD.

LEDZ

Hyperperformance Super SMD Interior Lights

The festoon adaptor is adjustable in length to suit 3 different sized globes 28, 31 and 36mm.

Cold Cathode

A Brighter Idea

With every new technology comes promises of greater performance, better cosmetics, lower emissions and even increased longevity of life. However, in many cases they are false promises being followed up by less than satisfactory outcomes and disappointed customers.

So is Cold Cathode technology just another cheap trick on the part of manufacturers in an ever more competitive market or is it a genuine leap forward in mobile lighting systems?

What is Cold Cathode:

A cold cathode light is basically a tubular light that works by passing an electrical current through a gas or vapor, much like Neon lighting. Nothing new here!

The main difference is as the name suggests the different "Cathode" system.

But what is a cathode I hear you ask? A "Cathode" is an electrode that emits electrons. When used in a normal gas discharge lighting system like a fluorescent tube or neon tube, the cathode is heated to create a "Hot Cathode". The heat created causes electron radiation emission from the cathode. This passes through the tube and illuminates the gas (ionization) as it is drawn by the differentiation in voltage to the other end of the tube. Because the voltage in this system after the transformer is alternating (AC) both ends act as an anode (Pos) and cathode (Neg) in turn.

In a hot cathode system it is completely reliant on the heating effect of the cathode (at one end) and thus can be difficult to start (often requiring a ballast and all sorts of starting strategies). When the heating is not quite up to scratch problems become evident. The advantage of a hot cathode is that the voltage transformer circuitry is kept relatively simple in terms of current regulation and voltage levels.

However, the down side is that it is also prone to premature failure, where the tell-tail signs of a strobing tube appear towards the end of its often too short life.

Cold cathode technology has many advantages over neon and fluorescent lighting.

To make a gas discharge tube work without a hot cathode, higher voltages are employed. In addition to that a different gas, different tube coating and some rare earth coatings on both cathodes at each end of the tube are also used. This higher voltage can cause a strong electric field near the cathodes but generally causes no problems to nearby equipment.

The combination of higher voltage coupled with the special interior surface of cold cathode lights produce secondary electrons at a ratio greater than 1 to 1 (Free amplification! Yippie!) upon electron and ion impact. This results in a brighter illumination for a given amount of energy input and no need to heat up a cathode.

Cold cathode lighting may be often compared with Neon lighting because of its appearance but there is simply no comparison when you view them side by side. A cold cathode lamp provides a higher lumen output with lower current draw and outlasts all other neon and fluorescent lighting systems on the market today. Cold cathode lamps are not affected by on/off cycles, a factor which greatly impacts the life expectancy of a fluorescent style lamp.

A cold cathode light can be up to five times brighter than neon lighting of the same size and current draw.

Cold cathode lights take as little as 7.5 watts of electrical energy per 1 foot (0.3 meters) and

are flicker-free. The instant power is supplied the cathode tube illuminates to its full brightness and remains so until the power is cut.

They may also take over the domestic market in low power consumption lighting as they are the only product of its type than can run on a standard dimmer circuit.

Not all cold cathode systems are equal. During our research we found that varying compositions of materials affected lighting performance.

Our comparison tests versus other products show superior performance over other cold cathode systems on the market. The new Aerpro range delivers on the promise! The future is clear. Whilst Cold Cathode tubes cost just a little bit more the volume of light output in return far out weighs the price difference.

Cold Cathode technology is a genuine leap forward in mobile lighting systems.

If you're after a product that delivers on the promise, Aerpro has you covered.

7.4" (188mm) Cold Cathode Neon

- "Brightness Index" rating: 9
- 12V Input
- Current: 0.28A
- 1A Fuse located inside cigarette lighter plug
- On/Off switch located on cigarette lighter plug
- Cable length 2M
- Overall length 237mm

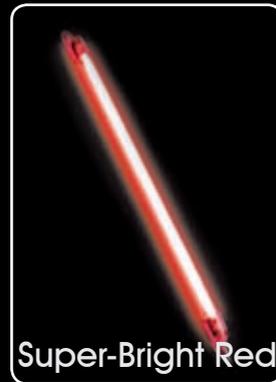

Super-Bright Blue

CCN8B

9 317114 897206

Super-Bright Red

CCN8R

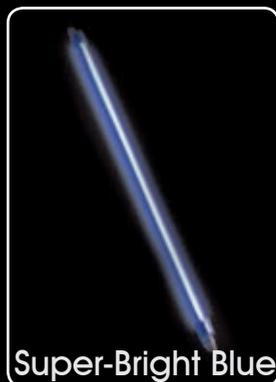

9 317114 897213

11.3" (287mm) Cold Cathode Neon

- "Brightness Index" rating: 9
- 12V Input
- Current: 0.33A
- 1A Fuse located inside cigarette lighter plug
- On/Off switch located on cigarette lighter plug
- Cable length 2M
- Overall length 338mm

glowz

Switch Black Light Responsive (BLR)

- Switch that glows blue when illuminated with black light

BLR509

Universal Phone & Drink Holder Black Light Responsive (BLR)

- Attaches to an air vent using plugs supplied
- Flip-down panel holds drink

BLR505

BLR Mini Compass

- Attaches to your vehicle using supplied double-sided tape
- Glows blue when illuminated with black light

BLR601

BLR Mini Digital Clock

- Mounted on adjustable base
- Supplied with double-sided tape for simple installation
- Glows blue when illuminated with black light

BLR602

Strobe Light on Mount

- Housed in a solid plastic case
- Flashes at approximately 2 Hz
- Housing is mounted on a swivel base allowing them to be tilted
- 80mm D x 50mm H, 65mm lens width
- Packed in hang sell, full colour blister

LU6NG

9 317114 875990

BLR Neon Sound Controller

- Allows your neon to beat to the music
- Simply plug your neon into the cigarette lighter socket provided
- On/Off/Sound switch and sensitivity control
- 1A maximum
- Glows blue when illuminated with black light

SC165

9 317114 882653

BLR Universal Phone Holder

- Simply attached using supplied double-sided tape
- Spring-loaded arms securely hold the phone in place
- Can also hold charger/hands-free cables

BLR105

9 317114 883766

Dual Drink Holder/ Accessory Tray Black Light Responsive

- Ideal for holding cans, phone, cigarettes, etc.
- Attaches to your vehicle using supplied double-sided tape
- Glows blue when illuminated with black light

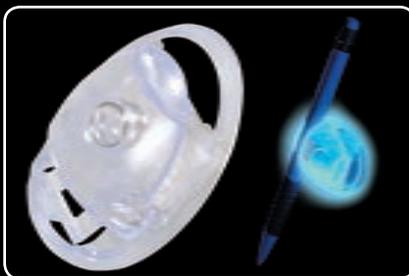

BLR501

9 317114 883773

BLR Pen & Pad Holder

- Attaches to your vehicle using supplied double-sided tape
- Glows blue when illuminated with black light

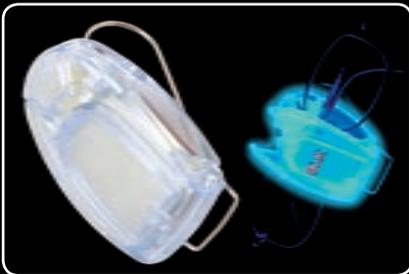

BLR603

9 317114 883469

BLR Sunglasses holder

- Supplied with both a spring clip and double-sided tape
- Glows blue when illuminated with black light

BLR604

9 317114 883476

BLR Thermometer

- Attaches to your vehicle using supplied double-sided tape
- Glows blue when illuminated with black light

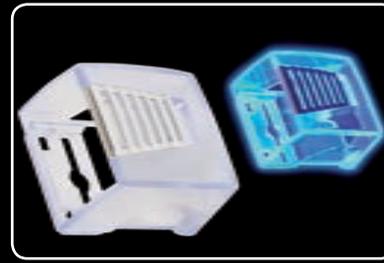

BLR605

 9 317114 883483

Universal Phone Holder Fixed Size

- Attaches to an air vent using plugs supplied
- Holds phone sized up to 47mm W x 27mm D

BLR608

 9 317114 883919

8" (200mm) Ultra Slim Black Light

- Fitted with switchable cigarette lighter plug.
- Great for compact installations where greater spread of light is required
- Overall length 270mm

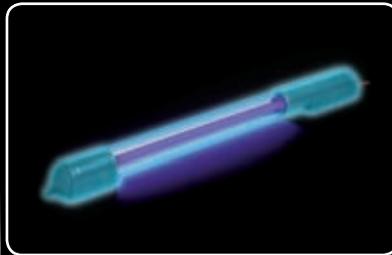

BLR7

 9 317114 882936

10" (254mm) Black Light Neon

- Black light with blue painted end caps
- Fitted with cigarette lighter plug and internal transformer
- Overall length 410mm

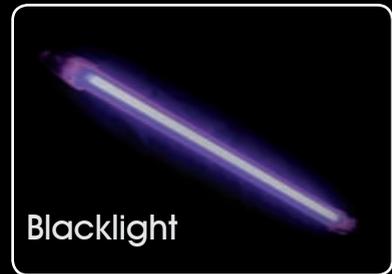

BLR4

 9 317114 883926

9.25" (235mm) Slimline Neon

- "Brightness index" rating: 6
- Overall length 305mm
- 12V Input
- Current: 0.28A
- 1A Fuse located inside cigarette lighter plug
- On/Off switch located on cigarette lighter plug
- Cable length: 2 Metres

Blacklight

SLN9BK

 9 317114 897909

11.6" (295mm) Slimline Neon

- "Brightness index" rating: 6
- Overall length 360mm
- 12V Input
- Current: 0.28A
- 1A Fuse located inside cigarette lighter plug
- On/Off switch located on cigarette lighter plug
- Cable length: 2 Metres

Blacklight

SLN12BK

 9 317114 897329

**120mm x 60mm
BLR Universal mini mirror**

- Housed in a solid plastic case
- Compact mirror supplied with suction cup for on glass mounting. Easily detached from suction cup for freestanding or hand-held use.

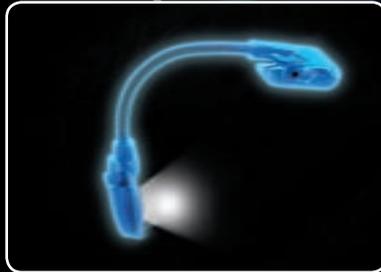

BLR220

9 317114 883391

BLR Clip on reading lamp

- Lamp is mounted to spring-clip via a flexible arm to simplify temporary use. Fitted with an extra-long cord and cigarette lighter plug. Glows blue when illuminated with black light.

BLR108

9 317114 883414

**310mm x 70mm
BLR Wide curve mirror**

- Clips onto existing rear-view mirror to provide wide-angle view towards rear of vehicle.

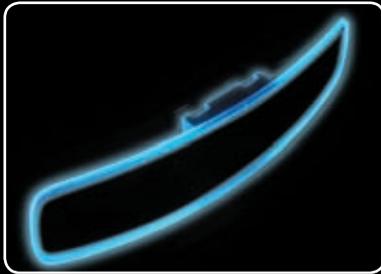

BLR200

9 317114 883353

**430mm x 70mm
Super wide curved mirror
with steel base**

- Clips onto existing rear-view mirror to provide extremely wide-angle view towards rear of vehicle

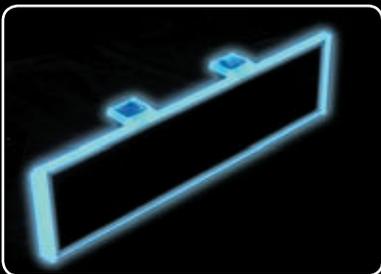

BLR202

9 317114 883360

**270mm x 70mm
BLR Wide flat mirror**

- Clips onto existing rear-view mirror for simple installation

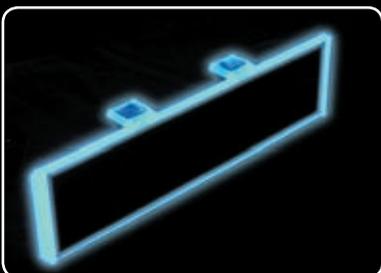

BLR210

9 317114 883377

**310mm x 70mm
BLR Wide flat mirror**

- Clips onto existing rear-view mirror for simple installation

BLR212

9 317114 883384

Passive Din Size Black Life Stereo Facia Frame

- Simply fits around your car stereo to illuminate surrounding area and nearby BLR products. Fitted with cigarette lighter plug and external transformer.

BLR21

9 317114 883698

Passive Double-Din Black Life Stereo Facia Frame

- Simply fits around your car stereo to illuminate surrounding area and nearby BLR products. Fitted with cigarette lighter plug and external transformer.

BLR22

9 317114 883704

Business Card Holder Black Life Responsive

- Attaches to your vehicle using supplied double-sided tape. Spring is pulled apart allowing cards, memos, etc. to be placed between coils. Glows blue when illuminated with black light.e

BLR606

9 317114 883896

Lite-up. Portable Ashtray Black Life Responsive

- Fitted with a blue LED that illuminates when the lid is opened. Glows blue when illuminated with black light.

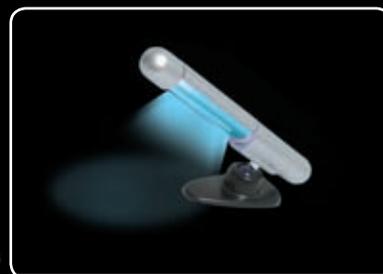

BLR607

9 317114 883902

50mm (2") Mini Black Light

- Fitted to swivel-base to simplify mounting and illumination direction. Great for cramped installations. Overall length 12cm (5.). Transformer housed in switchable cigarette lighter plug.

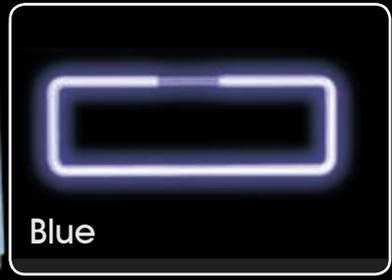

BLR2

9 317114 882929

Neon Car Stereo Facia Frame, DIN Size

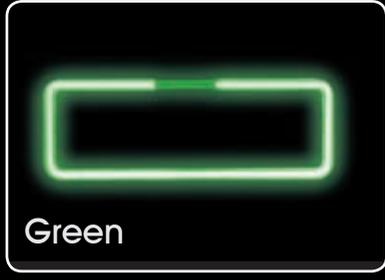

- Sound-Sensitive Stereo Facia Frame.
- Suit single din units.
